#### Memorandum for the Record

#### **Transportation Planning and Programming Committee of the Boston Region Metropolitan Planning Organization (MPO)**

#### June 24, 2010 Meeting

10:00 AM – 1:00 PM, State Transportation Building, Conference Rooms 2 & 3, 10 Park Plaza, Boston

David Mohler, Chair, representing Jeffrey Mullan, Secretary and Chief Executive Officer, Massachusetts Department of Transportation (MassDOT)

#### **Decisions**

The Transportation Planning and Programming Committee voted to take the following actions:

- approve the federal fiscal year (FFY) 2011 budget for the Central Transportation Planning Staff (CTPS), as recommended by the MPO's Administration & Finance Subcommittee
- elect the Metropolitan Area Planning Council (MAPC) to the vice chairmanship of the MPO's Transportation Planning and Programming Committee
- empower the Director of CTPS to hire MPO staff without seeking the approval of the MPO
- release the Draft FFY 2011 Unified Planning Work Program (UPWP) for a 30day public review period
- release the Draft FFYs 2011 2014 Transportation Improvement Program (TIP) for a 30-day public review period
- approve the minutes of the meeting of May 20 with recommended changes

#### Meeting Agenda

#### 1. Public Comments

John Lucas, Town of Rockland, requested that the MPO return the *Rockland – Salem Street* project to the TIP. He stated that the town has committed funds to pay for engineering. In response to a member's question, the project engineer reported that the project cost estimate is \$3.6 million, the project is at 75% design, and that it must still go through the right-of-way process.

Roland Bartl, Town of Acton, announced that the Commonwealth has awarded \$931,500 for the design of next two phases of the *Bruce Freeman Rail Trail* project and that with \$500,000 in Enhancement funding, the design can move forward.

Eric Hooper, Town of Sharon, requested support for a \$3 million project to improve signalization on South Main Street in Sharon. The town has redistricted the area for a business district and 40R housing with the intent to expand the town's tax base with retail, office, and residential developments. The project is at 75% design, and the town is awaiting comments from MassDOT Highway. At a later point during the public comment period, Ken Caputo, Coler & Colantonio, Inc., added that the TIP request only involves

the state highway elements and that there is \$4.5 million worth of additional investment underway in the business district, which has the potential to generate 400 new jobs.

Michelle Ciccolo, Town of Hudson, thanked the MPO for programming the *Hudson* – *Route 85* project. She reported that the town will soon submit 100% design plans to MassDOT Highway.

Dick Williamson, Friends of the Bruce Freeman Rail Trail, remarked upon the enthusiasm that people have for the Bruce Freeman Rail Trail. He stated that 125 people, including state representatives, attended the announcement of the state award for the project design. The Friends of the Bruce Freeman Rail Trail will be advocating for construction funding in the future.

Bill Sedewitz, Town of Framingham, requested that the MPO program funds for the *Framingham – Route 126* project in the FFY 2011 element of the TIP. The project is nearly at the 25% design stage and will be at full design by the end of the year, he said. The project has a federal earmark and the town is willing to provide funding that is not covered by that earmark. He also noted that work on gas and sewer lines will be complete by spring 2011. He stated that the total project cost estimate is \$7.5 million and the earmark is for \$4.5 million with \$500,000 in Enhancement funds. A discussion followed about the description of the project in the earmark (which includes a bridge replacement). Ginger Esty, Town of Framingham, advised that corrections be made to the interpretation of how the earmark funds are to be used. Michael Chong, Federal Highway Administration (FHWA), stated that FHWA would have to follow-up to ensure that the earmark language is consistent.

Dave Daltorio, Town of Hopkinton, requested that the MPO program a project for infrastructure and signalization improvements on the Route 135/Route 85 corridor. He stated that the town has appropriated funds for the design of the project.

John Woodsmall, Town of Southborough, reported on the progress of the *Southborough* – *Route 30/Main Street* project. Following a decision by the Board of Selectmen last week regarding design impacts to the town common, the project proponents will be able to move forward in preparing the revised 25% design plans, which are expected to be complete in the fall. He requested the MPO's consideration for programming the project if funds become available.

Steve Rollins, Town of Hanover, requested that the MPO program the final segment of the *Hanover – Route 53* project. He noted that the project is among the list of projects that MPO staff would recommend funding if money were available, and that the project – which costs less than \$1 million – is the least expensive of those projects. In response to a member's question, he reported that the town has completed its right-of-way work and that the project is at the 25% design phase. The project cannot receive final review from MassDOT Highway until it is programmed on the TIP, however. In response to a member's questions about the project's readiness, S. Rollins explained that MassDOT Highway still has to do its right-of-way work, but the town could have the project ready

by FFY 2011 or 2012. The project adds capacity; it connects the two finished segments of the roadway and would remove the existing bottleneck. The project is included in the MPO's long-range transportation plan.

Robert Markel, Town of Ipswich, requested the MPO's support for the *Ipswich – Route 1A/Route 133* project. He stated that the project includes \$880,000 worth of storm water improvements. The roadway is in poor condition and may require interim work to be done this year. It is the main artery to Cape Ann and important for the area's tourist economy. The storm water improvements will improve the quality of the storm water that flows into the Ipswich River, which supports the area's clamming industry.

Bill Deignan, City of Cambridge, requested that the MPO move the *Cambridge – Cambridge Common* project to an earlier TIP element, such as FFY 2011 or 2012. He reported on the heavy bicycle, pedestrian, and transit usage in the area of the Common. MassDOT Highway is reviewing the 25% design plans.

Joe Stigliani, Town of Hull, requested MPO support for a project for the reconstruction of Atlantic Avenue in Hull, which is one of three roads that lead out of the town. Following a public hearing on July 30, the 25% design plans will be submitted to MassDOT Highway. In response to a member's question regarding environmental issues associated with the project, J. Stigliani stated that the roadway abuts an Area of Critical Environmental Concern and that this project presents an opportunity to correct a drainage problem.

Trish Domigan, Vanasse Hangen Brustlin, Inc., provided an update on the *Danvers* – *Liberty Street* project and requested that the MPO program the project in the FFY 2011 element of the TIP. She reported that plans for the culverts will be submitted to MassDOT on June 26. The culvert design will allow for better flushing of water from the marsh. The 100% design plans are pending, right-of-way is secured, and the environmental permitting will be finalized soon, she said. The project proponents are working with MassDOT to reduce the project cost.

#### 2. Chair's Report – D. Mohler, MassDOT

There was none.

### 3. Regional Transportation Advisory Council – Schuyler Larrabee, Regional

Transportation Advisory Council

The Advisory Council will meet next on July14. A presentation on GreenDOT and the Healthy Transportation Compact will be on the agenda. The Route 128 Business Council has joined the Advisory Council.

#### 4. Director's Report – Arnie Soolman, Director, CTPS

A. Soolman reported that the MPO's Coordinated Human Services Transportation Plan has been updated. The document will be posted on the MPO's website after July 6. This plan inventories transportation services in the region that are available to the elderly and people with disabilities. It serves as a guide for people who are proposing new services and as a guide to MPO staff in evaluating proposed services. MassDOT will be soliciting additional projects for the Job Access/Reverse Commute (JARC) and New Freedom Programs this summer.

Mary Pratt, Town of Hopkinton, pointed out that some of the proposals received for the MPO's Clean Air and Mobility Program could be eligible for JARC and New Freedom funding.

A. Soolman also noted that MPO staff members Hayes Morrison and Ben Krepp were recognized by the Chicago Metropolitan Agency for Planning for their work in developing the MPO's interactive TIP database.

#### 5. Subcommittee Chairs Reports – Paul Regan, MBTA Advisory Board

The Administration & Finance Subcommittee recommended that the Committee approve the new FFY 2011 CTPS budget, which is level funded with a few minor line item changes.

A motion to approve the FFY 2011 budget for CTPS, as recommended by the Administration & Finance Subcommittee, was made by P. Regan, and seconded by M. Pratt. The motion passed unanimously.

### 6. **MARPA Consultations** – David Anderson, MassDOT Highway Division, and Eric Bourassa, MAPC

D. Anderson reported that the Massachusetts Association of Regional Planning Agencies (MARPA) held a kick-off meeting to start the discussion about the allocation of federal transportation dollars. A subcommittee will be formed to take a fresh look at how those dollars are allocated to line items.

E. Bourassa added that the group talked about the funding that is directed to MassDOT projects and municipal projects (with about 90% of the Boston Region MPO's target directed toward state highway projects), and voiced concerns about a potential decrease in funding that could undermine the MPO planning process. He noted that the MPO needs to be engaged in this process and that a balance must be struck between investment in state and municipal projects and MPO priority areas.

M. Pratt advocated for a gas tax with revenues dedicated to fund municipal roadway improvements.

P. Regan remarked upon the \$3 billion funding gap identified in MassDOT Highway's five-year Capital Investment Plan, the MBTA's deficits, and the MPO's fiscal situation. He cautioned against solutions that would result in transportation divisions and MPOs "robbing" one another of funds. He stated that a broader solution is needed to address the fiscal problem.

Tom Bent, City of Somerville, stated that the Boston Region MPO should have a place at the table at future MARPA discussions. D. Mohler stated that MAPC is representing the

Boston Region MPO on the MARPA subcommittee. Lourenço Dantas, Massachusetts Port Authority, expressed concern that the staff of the Boston MPO does not have representation on MARPA, whereas other MARPA members are also staff to their MPOs. D. Mohler stated that the Boston MPO could designate a CTPS staffer or another MPO member to MARPA in place of MAPC, but that only one representative from the MPO could attend.

Jim Gillooly, City of Boston, and T. Bent asked that the MPO be apprised of the options that are being considered at MARPA, before final decisions are made. E. Bourassa added that MARPA's decisions on targets should be approved by the MPO.

M. Pratt stated that MAPC should remain the MPO's MARPA representative. A. Soolman noted that it is valuable for the MPO staff to sit in on the MARPA meetings and asked that the MPO staff be invited to attend. G. Esty supported this idea.

7. Amendment Five of the FFYs 2010 – 2013 TIP – Joe Cosgrove, Director of *Planning/Development, MBTA, and Frank DePaolo, Assistant General Manager, MBTA* At the meeting of June 3, MPO members raised questions about the coordination of MBTA repair work on the Braintree Garage, the Old Colony commuter rail line, and the Union Street Bridge. F. DePaolo, Assistant General Manager for the MBTA, attended this meeting to provide information on the project schedules and to answer members' questions.

He explained that the project to replace ties on the Old Colony line will begin in September and extend through the end of calendar year 2011. Work will begin on the southern sections of the line first. The mainline work (from Braintree north) will likely occur toward the end of 2011. The MBTA will maintain weekday, peak hour commuter rail service, and provide free bus service to and from the Braintree Red Line station during mid-day work hours. The work on the mainline will occur on the weekends, at which time there will be no commuter rail service. The repainting of the Union Street Bridge will be part of the Old Colony work. The project to repair three MBTA garages may be conducted under separate contracts. The Braintree garage would likely be the first one to undergo repairs. The garage repairs will take place after the mainline work. Bids may go out by the end of 2011.

Christine Stickney, Town of Braintree, asked if the scope of work includes fixing a water pipe leak beneath the bridge, and how the MBTA would be handling public relations. F. DePaolo stated that he would look into the pipe issue. Regarding public relations, he said that the MBTA staff has visited every town affected by the projects. The MBTA has a webpage for the project, and will relay information via "seat drops" on trains, and public meetings and alerts.

### 8. Election of Vice Chair – David Mohler, MassDOT

A motion elect MAPC to the vice chairmanship of the MPO's Transportation Planning and Programming Committee was made by P. Regan, and seconded by M. Pratt. The motion passed unanimously.

### **9.** Administration & Finance Subcommittee Recommendation – Paul Regan, MBTA Advisory Board

The Administration & Finance Subcommittee has recommended that the Director of CTPS have the authority to hire MPO staff without seeking the approval of the MPO.

A motion to empower the Director of CTPS to hire MPO staff without seeking the approval of the MPO was made by John Romano, MassDOT Highway Division, and seconded by T. Bent. The motion passed unanimously.

## **10. Draft FFY 2011 Unified Planning Work Program** – Mary Ellen Sullivan, UPWP Manager, MPO Staff

The UPWP Subcommittee met this morning and recommended that the MPO endorse its recommendation to approve the Draft FFY 2011 UPWP for release to the public. Members were provided with draft copies of the document.

M.E. Sullivan summarized the development process for the document, noting that the process began in February 2010. During the development, consideration was given to public comments and recommendations from the Federal Highway Administration (FHWA) and the Federal Transit Administration. Federal guidance led to the development of the work programs for *Maintenance Costs for Municipally Controlled Roadways*, *Emergency Evacuation and Hazard Mitigation Mapping Phase 2*, and *Livable Communities Workshop Program*.

No corridor studies were included this year due to financial constraints. New projects include the work programs for *Impacts of Walking Radius on Transit Reliability and Frequency, Bicycle Network Evaluation, MPO Freight Study Phase 2, Regional HOV Systems Planning, and Roundabout Installation Screening Tool.* 

A motion to release the Draft FFY 2011 UPWP for a 30-day public review period was made by T. Bent, and seconded by M. Pratt. The motion passed unanimously.

### 11. Draft FFYs 2011 – 2014 Transportation Improvement Program – Hayes

Morrison, TIP Manager, MPO Staff, and Joe Cosgrove, Director of Planning/Development, MBTA

Members were provided with TIP tables showing the revised staff recommendation for the Draft FFYs 2011 - 2014 TIP and cash flows. (See attached.)

### Highway Element

H. Morrison discussed the cash flows noting that for FFY 2011 the MPO has an additional \$17.85 million of target funding due to the \$5.37 million worth of additional obligation authority coming into the region and a surplus of \$12.48 million due to lower bids on the *Danvers/Peabody* – *Route 128 at Route 35 and Route 62* project. The MPO has a total remaining target of \$19.22 million within the four years of the TIP, the majority of which (\$17.8 million) is available in FFY 2011 (after the programming of

projects from the FFYs 2010 - 2013 TIP that have not yet been advertised). Staff is recommending that the MPO program those funds for the following projects:

- *Hudson Route 85* (\$10.8 million)
- *Marshfield Route 139* (\$5.68 million)
- *Milford Route 16 Intersection Improvements* (\$3.5 million)

To incorporate these projects in FFY 2011, the cash flows were adjusted for the *Concord/Lincoln – Route 2 (Crosby's Corner)* project in that TIP element. (D. Mohler noted that the cash flow change is consistent with the cash flow needs of the project.) Also, the *Boston – South Bay Harbor Trail (Construction)* project was moved outward from the FFY 2010 element of the TIP to the FFY 2014 element.

Members then discussed the target-funded highway portion of the TIP.

J. Gillooly raised questions about the proposed action to move the *Boston – South Bay Harbor Trail (Construction)* project to the FFY 2014 element. H. Morrison stated that the project has outstanding right-of-way certificates. J. Gillooly responded that the right-of-way issue affecting the project's readiness is being addressed. He added that the project has the support of the bicycle and pedestrian community, and that it would provide a connection from the urban core to the waterfront. He suggested that the excess target money in FFY 2010 could have been used to fund this project.

David Koses, City of Newton, stated that projects, which have already been in a TIP, should be given priority in the FFY 2011 element before projects that are new to the TIP process.

D. Koses asked if any of the projects from the FFYs 2010 - 2013 TIP that have not yet been advertised could be ready for FFY 2011. L. Dantas asked about the readiness of the *Milford – Route 16 Intersection Improvements* project.

In response, D. Anderson provided updates on the readiness of the projects under consideration. He indicated that the MPO's programming decision needs to be based on which projects can be ready in time and consideration given to whether there is a likelihood that factors could slow down the process of making a project ready.

The status of the three recommended projects – all of which are progressing well – is as follows:

- *Hudson Route 85* will be at the 100% design phase in FFY 2011.
- *Marshfield Route 139* is at the 75% design phase.
- *Milford Route 16 Intersection Improvements* was advanced to the 75% design phase, but a new design will be submitted that better address pedestrian needs. Another public hearing may be needed.

The status of the projects in the FFY 2010 - 2013 TIP (that have yet to be advertised) is as follows:

- The *Arlington Massachusetts Avenue* project would not be made ready for FFY 2011 due to issues such as the need for a resubmission of the design and right-of-way planning.
- The *Boston South Bay Harbor Trail (Construction)* project would not be ready for FFY 2010 due to a right-of-way issue.
- MassDOT Highway has a 25% design submittal for the *Cambridge Cambridge Common (Construction)* project, but no preliminary right-of-way plans. A public hearing would need to be held. The environmental permitting would not be challenging.
- Preliminary right-of-way plans are still needed for the *Somerville Beacon Street* project.

Regarding the *Boston – South Bay Harbor Trail (Construction)* project, J. Gillooly stated that the project could be ready for FFY 2010, and that the city would like to see the project in the FFY 2011 element, if not in FFY 2010.

Regarding the *Cambridge – Cambridge Common (Construction)* project, Bill Deignan, City of Cambridge, stated that the project is within the existing right-of-way.

D. Koses asked about the readiness of the *Hanover – Route 53 Reconstruction* project. H. Morrison replied that the project is at the 25% design phase. The project adds capacity, but is already included in the long-range transportation plan. J. Gallagher requested that the Committee be provided with an answer regarding whether the Hanover project could be ready for FFY 2011.

H. Morrison then summarized the changes to the target funded portions of the FFY 2012, 2013, and 2014 TIP elements. In FFY 2012 there is a minor cost increase to the *Arlington* – *Massachusetts Avenue* project. In FFY 2013 there is a cost reduction to the *Concord/Lincoln* – *Route 2 (Crosby's Corner)* project and a cost increase to the *Weymouth* – *Route 18* project. The *Cambridge* – *Cambridge Common (Construction)* project was moved from the FFY 2013 element to the FFY 2014 element. The *Boston* – *South Bay Harbor Trail (Construction)* project was also moved to the FFY 2014 element. The amount of funding for the *Concord/Lincoln* – *Route 2 (Crosby's Corner)* project was increased in FFY 2014.

A motion to move the *Milford – Route 16 Intersection Improvements* project from the FFY 2011 element of the Draft FFYs 2011 – 2014 TIP to the FFY 2014 element, add the *Boston – South Bay Harbor Trail (Construction)* project to the FFY 2011 element, and to adjust the cost flows of the *Concord/Lincoln – Route 2 (Crosby's Corner)* project to restore the target balance in that element, was made by J. Gillooly, and seconded by D. Koses.

During a discussion of this motion, the Chair requested that staff provide a description of the Milford project. H. Morrison explained that the project would upgrade every major intersection along Route 16 in Milford (seven intersections), bring the intersections into

compliance with the Americans with Disabilities Act (ADA), and could possibly provide air quality benefits.

J. Gillooly urged the members to support programming the *South Bay Harbor Trail* project in FFY 2011 considering that the project has already been in the TIP (whereas the Milford project is new to the TIP), that the project has been in development for six or seven years already, and that it will bring benefits to an environmental justice community by providing safe access to the waterfront from a landlocked area.

M. Chong, FWHA, objected to the MPO adjusting cash flows of the *Crosby's Corner* project and noted that the MPO must program funds for the year that those funds are needed. D. Anderson stated that spending on the *Crosby's Corner* project would probably not occur until the fourth quarter of FFY 2011. J. Gillooly pointed out that the staff recommendation for the TIP already includes cash flow adjustments to the *Crosby's Corner* project, and that his recommendation would not have a major impact on that project.

D. Koses added to J. Gillooly's recommendation by suggesting that cash flows for the *Crosby's Corner* project could be further adjusted to make room for the \$1 million *Cambridge Common* project in FFY 2011.

E. Bourassa raised the issue of whether it would be fair to move the *South Bay Harbor Trail* project out to FFY 2014 considering the MPO's policy of advancing projects that are already in the TIP. J. Gillooly also cautioned about the MPO starting to change that policy.

M. Pratt expressed support for programming the Milford project in FFY 2011, noting that the road needs to be fixed and that it needs to be brought into compliance with the ADA.

P. Regan also expressed support for programming the Milford project in FFY 2011 because he believes it is a regionally significant air quality improvement project, while the *South Bay Harbor Trail* project is not. He stated that the MPO should be focused on funding basic transportation projects that improve air quality and mobility.

Joe Onorato, MassDOT Highway District 4, stated that the City of Boston has not presented its solution to the *South Bay Harbor Trail* project's right-of-way issue to MassDOT Highway, so the agency does not know if the solution would solve the problem.

Bryan Slack, MassDOT Highway District 3, stated that the Milford project is a priority for District 3 and that the final design is anticipated by next spring.

J. Gillooly noted that if the City of Boston does not convince the MPO and MassDOT that the *South Bay Harbor Trail* project will be ready for FFY 2011 during the public comment period for the TIP, the MPO could still remove the project after the public comment period.

A motion to close discussion and take up J. Gillooly's motion was made by Christine Stickney, Town of Braintree. The motion failed. The following members voted no: MassDOT; MassDOT Highway; Massachusetts Port Authority; MBTA; MBTA Advisory Board; and the towns of Bedford, Braintree, Framingham, and Hopkinton. The following members voted yes: the cities of Boston, Newton, and Somerville; MAPC; and the Regional Transportation Advisory Council.

A motion to move the *Milford – Route 16 Intersection Improvements* project to the FFY 2014 element of the Draft FFYs 2011 – 2014 TIP and to add the *Cambridge – Cambridge Common (Construction)* project to the FFY 2011 element was made by D. Koses, and seconded by J. Gillooly. The motion failed. The following members voted no: MassDOT; MassDOT Highway; Massachusetts Port Authority; MBTA; MBTA Advisory Board; the city of Somerville; the towns of Bedford, Braintree, Framingham, and Hopkinton; and the Regional Transportation Advisory Council. The following members voted yes: MAPC and the cities of Boston and Newton.

During a discussion of this motion (prior to the vote), G. Esty noted that it would be more equitable, in terms of geography, for the MPO to support the Milford project (in FFY 2011). D. Koses stated that it is good policy for the MPO to keep projects in the TIP and to not have new projects move in ahead of previously programmed ones. T. Bent voiced agreement adding that the MPO would lose credibility if it did not hold to this policy and that projects should not be dropped from the TIP unless there is a compelling reason. J. Gillooly also agreed that programmed projects should not be moved because of a new project.

P. Regan countered by stating that since there is a limited pool of transportation funding available, the MPO should be choosing projects based on which ones will bring the most benefits in terms of mobility and air quality.

M. Pratt advised that the MPO stop inviting municipalities to bring new projects to the MPO, considering that the MPO does not have the funds to pay for existing projects.

A motion to approve the release of the highway element of the Draft FFYs 2011 - 2014 TIP as presented for a 30-day public comment period was made by C. Stickney, and seconded by M. Pratt. The motion passed unanimously.

### Transit Element

J. Cosgrove provided an overview of the transit element of the TIP. (See attached tables showing transit project costs and descriptions.) He explained that federal funding is becoming increasingly important for the MBTA's Capital Investment Program (CIP), and that the MBTA is using its bond funds to match federal dollars.

Twenty-five percent of CIP funds are being spent on vehicles programs. The MBTA will be receiving locomotives this fall through a deal with Utah Transit Authority, and then it will receive 20 new locomotives between November 2012 and 2013. New commuter rail

Transportation Planning and Programming Committee Meeting Minutes of June 24, 2010

coaches will be procured between August 2011 and 2012. Coach overhauls will be done from next spring through 2014. The MBTA also has a program to overhaul its CNG bus fleet. Subway programs include procuring new Orange Line vehicles through FFY 2018, replacing Red Line cars through FFY 2018, and overhauling Red Line cars beginning this summer. Other important initiatives are the *Bridge and Tunnel Program*, *Track Upgrade Program*, and the *Accessibility Program*.

J. Cosgrove also discussed federal earmarks, including a Small Starts earmark for the *Fitchburg Line Improvements* project, and a New Starts earmark for the *Orange Line – Assembly Square* project.

Members then discussed the transit element.

P. Regan asked if the MBTA will be constrained in using its own bond funds to match federal dollars in FFY 2015 and beyond. J. Cosgrove acknowledged that this is a concern and stated that the MBTA's finance group is working on ways to fully-fund the vehicle programs. P. Regan then commented on the mounting state-of-good repair needs of the MBTA and the agency's limited ability to match federal funds in the future.

M. Pratt also expressed concern about the financial situation and emphasized the need to do basic state-of-good repair, such as electrical upgrades, on the system.

P. Regan asked if the MBTA has selected a medium for Automated Fare Collection on the commuter rail. J. Cosgrove replied that there will be a pilot program in 2011 or 2012.

Regarding projects that have federal earmarks, P. Regan asked whether the MBTA would have to pay the balance of projects costs if the earmarks are insufficient. J. Cosgrove explained that the situation differs from case to case. Some earmarks would lapse and the balance on others would be the responsibility of municipalities.

J. Gillooly requested that the MBTA provide information to clarify how much money has already been spent on line items in the MBTA Federal Funding Program and how much is to be spent moving forward.

A motion to approve the release of the Draft FFYs 2011 - 2014 TIP for a 30-day public review period was made by P. Regan, and seconded by T. Bent. The motion passed unanimously.

**12. Meeting Minutes** – *Pam Wolfe, Manager of Certification Activities, MPO Staff* A motion to approve the minutes of the meeting of May 20 – with changes to pages 10 and 11 as recommended by E. Bourassa – was made by T. Bent, and seconded by J. Romano. The motion passed unanimously.

M. Pratt reiterated a point that she made at the meeting of May 20 when she stated that some of the Clean Air and Mobility Program applications might be eligible for funding through the JARC or New Freedom Programs, and that the Clean Air and Mobility

Program subcommittee should coordinate with the MPO's Regional Equity Manager on this matter.

### 13. Work Program for 2010 Freight Study

The discussion of the work program for 2010 Freight Study – A Profile of Truck Impacts was postponed until the next meeting.

### 14. Safety and Operations Analyses at Selected Intersections: Selection Procedure –

Karl Quackenbush, Deputy Technical Director of CTPS Members approved the selection procedure for the Safety and Operations Analyses at Selected Intersections study. (See attached memorandum.)

### 15. GreenDOT

The presentation on GreenDOT was postponed.

### 16. State Implementation Plan Update – David Mohler, MassDOT

MassDOT will provide a status update on the State Implementation Plan in July, when it will be submitting its annual status report to the Department of Environmental Protection.

### **17. Members Items**

Staff will provide a briefing on the preparations for the MPO's recertification process, which will take place the week of July 26.

#### 18. Adjourn

A motion to adjourn was made by J. Gillooly, and seconded by J. Romano. The motion passed unanimously.

Staff to the Boston Metropolitan Planning Organization

### **MEMORANDUM**

### DATE: June 24, 2010

**TO:** Transportation Planning and Programming Committee of the Boston Region Metropolitan Planning Organization

#### FROM: Chen-Yuan Wang, Project Manager

#### **RE:** Safety and Operations Analyses at Selected Intersections: Selection Procedure

This study was one of the recommendations from the Boston Region MPO's Congestion Management Process (CMP), funded through the MPO's Unified Planning Work Program. The study's purpose is to evaluate up to twelve intersections from through out the region and develop recommendations for safety and operations improvements.

The selection of intersections was based on two major sources. The first was the MassDOT Registry Division 2006-2008 crash database, which includes all the intersections and interchanges in the Commonwealth. The selection procedure consisted of the following steps:

- Rank all the intersections in the Boston region by the number of EPDO<sup>1</sup> (Equivalent Property Damage Only) crashes.
- Retain intersections with a high number of EPDO crashes.
- Exclude intersections that were already programmed in the 2010-2013 Transportation Improvement Program, have been or were being studied by the MPO or other agencies.
- Exclude large complicated intersections and locations related to highway interchanges or major traffic rotaries.
- Exclude intersections belonging to a group of intersections that may require a corridor or a subarea study.
- Review the screened intersections' location, geometry, and congestion conditions from the CMP database.
- Identify top 25 intersections.
- Contact the cities and towns about any existing intersection studies or designs and determine their interest in project implementation.

The second source was through the coordination with MAPC to solicit potential locations from MAPC Subregions and individual cities and towns. Danvers and Rockport proposed several intersections. Staff applied the similar steps above to evaluate the proposed intersections and selected a Rockport intersection with location significance and an EDPO value higher than that of other intersections on the proposed list.

<sup>&</sup>lt;sup>1</sup> EPDO = 10 \* Fatality Crashes + 5 \* Injury Crashes + 1 \* Other Crashes (Property Damage Only or Not Reported)

In summary, the selection was comprehensive and was applied iteratively with extensive data screenings and numerous interactions with cities and towns. Nine intersections were selected through this intensive effort. Table 1 lists the selected intersections by their locations, total number of EPDO crashes from 2006 to 2008, total number of crashes, the number of fatal/injury crashes, and the number of crashes involving with pedestrians or cyclists.

City/Town	Street 1	Street 2	2006-08 EDPO	Total Crashes	Fatal Crashes	Injury Crashes	Ped./Bike Crashes
Natick	Rte 135/ West Central St	Speen St	149	93	0	14	0
